SUMMARY

Motivated Cross-Platform Flutter Developer skilled in building clean, responsive, and high-performance mobile applications for both Android and iOS. Proficient in state management using BLoC, clean architecture, and implementing modern UI/UX patterns. Experienced in integrating RESTful APIs and Firebase services including Authentication, Firestore, and real-time features to deliver scalable, connected applications. Strong problem-solving abilities, attention to detail, and a collaborative mindset, with a commitment to continuous learning and delivering user-centered, high-quality products.

EDUCATION

Bachelor of Computer Science, Menoufia University **2022-2026**

Faculty of Computer and Information – GPA: 3.12

INTERNSHIP

- **Mobile Application Development** ***Present***
  6 months Internship Cross platform mobile application development with Flutter - DEPI
- **Full Stack** **(Jul 2025 - Aug 2025)**
  120 Hours Full Stack Development with PHP Summer Training - NTI

PROJECTS

1- Carpooling App (Graduation Project)

- **Project Description:**
  Developing Ftareqi, a carpooling mobile application that enables users to share rides and split trip costs. The app focuses on smooth user flow, authentication, localization, and scalable state management..
- **Time:** *Present*
- **Technologies Used:**
  - Dart, Flutter
  - Flutter Bloc (Cubit)
  - DIO for API requests

- Shared Preferences for local storage

2- Metro Guide App (Rota)

- **Project Description:**
  Developing Rota, a metro guide mobile application that provides intelligent route planning and comprehensive transit information. The app enables users to discover the best two routes between any two stations, displaying key metrics like station count, transfer requirements, and ticket pricing. Features include a complete line directory with station listings, connected line visualization at transfer points, multi-language support, and dynamic theming. Built with scalable MVVM architecture and Cubit for state management for optimal performance and maintainability.
- **Time:** *Present*
- **Technologies Used:**
  - Dart, Flutter
  - Flutter Bloc (Cubit)
  - MVVM Architecture Pattern
  - Shared Preferences for local storage
  - Localization (Easy Localization)
  - Light/Dark Theming

3- Students Data Management App

- **Project Description:**
  Built a student management application for teachers to manage weekly appointments and track students across different grades. The app supports real-time updates and full CRUD operations.
- **Time:** *September 2025*
- **Technologies Used:**
  - Dart, Flutter
  - Firebase Authentication
  - Cloud Firestore
  - StreamBuilder

4- E-Commerce App (Faculty Course Project)

- **Project Description:**
  Developed a functional e-commerce application featuring product listings and detailed item views with a clean and responsive UI across platforms.
- **Time:** *May 2025*
- **Technologies Used:**
  - Dart, Flutter
  - GridView.builder
  - Navigator
  - Mock API data

5- Simple Loan Benefits Calculator

- **Project Description:**
  Created a loan calculator application to estimate monthly payments and total interest based on user input, with real-time calculation updates.
- **Time:** *April 2025*
- **Technologies Used:**

- Dart, Flutter
- setState for state updates
- Responsive UI design

6- To-Do App

- **Project Description:**
  Built a cross-platform to-do application allowing users to create, edit, and delete tasks with persistent local storage.
- **Time:** *April 2025*
- **Technologies Used:**
  - Dart, Flutter
  - Shared Preferences

7- Students Data Management System

- **Project Description:**
  Designed and implemented a GUI-based system to manage student grades, including data validation and accurate grade calculations.
- **Time:** *September 2023*
- **Technologies Used:**
  - Java
  - Java Swing
  - MySQL

CERTIFICATES

Java Programming 2 Course
EDRAAK (Arab Open University) Java Programming 2 Course

Full Stack Summer Training – HTML5, CSS3, Bootstrap, JavaScript, PHP, Laravel
NTI (120 Hours) Full Stack PHP Summer Training.

TECHNICAL SKILLS

- **Programming languages:** Dart, C, C++, SQL, JS, Java, Python
- **Backend & Cloud**: Dealing with REST APIs, Firebase | Auth, Firestore.
- **Frameworks:** Flutter, Boot Strap, Java Swing, JavaFX.
- **Core Concepts:** Clean Architecture, MVVM, OOP, SOLID Principles, Unit Testing Basics.
- **Development Tools & Software:** Visual Studio Code, Android Studio, Jupyter Notebook, NetBeans, IntelliJ Idea, Dev C++, Microsoft Visual Studio.
- **Version Control Tools:** Git, GitHub.

SOFT SKILLS

- Communication
- Time Management
- Desire to learn
- Teamwork
- Presentation Skills
- Attention to detail

LANGUAGES

- **Arabic** (Native)
- **English** (V.Good)
